Docket # 7523-00

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re the application of: A. Farooq, et al.

Serial No.: 10/803,586

Group No.: 1751

Filed: March 18, 2004

Examiner:

For: Oil-Containing Starch Granules for Delivering Benefit-Additives to a Substrate

Commissioner for Patents

P.O. Box 1450

Alexandria, VA 22313-1450

REQUEST FOR CORRECTED FILING RECEIPT

1. The attached is a copy of the official filing receipt received from the PTO in the above application for which issuance of a corrected filing receipt is respectfully requested. Also, attached is a copy of the original transmittal with express mail certificate indicating the mailing date as 3/18/04 and receipt of express mail certificate stamped as received in the U.S. Post Office on 3/18/04. Our return receipt postcard is also attached, however, it is date stamped by the PTO on 3/17/04 instead of 3/18/04.

2. There is an error with respect to the following data which is:

☒ incorrectly entered

and/or

☐ omitted

Date Mailed: 06/02/2004

Receipt is acknowledged of this regular Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Filing Receipt Corrections, facsimile number 703-746-9195. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

**Oil Containing Starch Granules for Delivering Benefit-Additives
to a Substrate**

This invention relates to an oil containing starch granule comprising a starch which
5 forms a matrix for said granule, a perfume oil and a compound of defined structure for
inhibiting the migration of the oil to the surface of the starch granule. More particularly, this
invention relates to an oil containing starch granule containing a defined perfume oil which is
capable of delivering a benefit-additive to substrates such as fabrics, hard surfaces, hair and
skin, upon contact of the starch granule with such substrate.

Background of the Invention

The addition of perfume to a liquid detergent composition to impart a pleasing aroma
or fragrance to such detergent composition is well-known in the art. The presence of perfume
provides an aesthetic benefit to the consumer upon use of the detergent composition and
15 generally serves as a signal of freshness and cleanliness for laundered fabrics which contain a
pleasing fragrance. However, notwithstanding the enhanced aroma of the detergent
composition itself, relatively little of the perfume fragrance is imparted to fabrics during
laundering. Primarily, this is because the perfume ingredients in the liquid composition are
rapidly dispersed and diluted during laundering in the aqueous wash and rinse waters.
20 Consequently, only a relatively limited amount of the perfume is available to contact the
fabrics during washing, the major portion of the perfume being drained from the washing
machine with the wash solution. There remains, therefore, a need in the art to improve the
effectiveness of delivering perfume from a detergent composition to washed fabrics and to
enhance the longevity of such fragrance on the fabrics.

25 Similarly, there is a need in the art to effectively deliver oils other than a perfume
fragrance as benefit-additives to substrates such as hard surfaces, hair and skin such that the
longevity of such oils upon the substrate is significantly enhanced relative to conventional
means of providing such benefit additive to the substrate.

Summary of the Invention

The present invention provides an oil containing starch granule comprising

(a) a starch, said starch being present in an amount to form an effective matrix for
said granule;
